## Goodyear RHS - Steer Tread

The high performance tyre suited for extensive use in urban areas and on lift/free axles.

### Available Sizes:

295/80 R22.5

315/80 R22.5

### Features and Benefits.

- Additional traction and enhanced handling characteristics.
- Proven versatile applications in regional and urban environments.
- Suitable for high mileage urban applications.
- This pattern ensures additional traction under all road conditions while optimising stability and reducing noise levels.

# Marangoni DHM - Drive Tread

The high mileage, long distance tread.

## Available Sizes:

295/80 R22.5

315/80 R22.5

## Features and Benefits

- Excellent traction in wet and dry conditions.
- Tread design to maximise mileage and offer greater fuel efficiency thus, reducing running costs.
- Wide profiles available for greater stability.
- Unique compound for long lasting wear.
- Well proven tread design provides increased grip and stability in high horsepower, long distance drive axle applications.
- Proven tread designs.
- Cool running compound for optimum performance
- The tread designs, which ETTS offer, deliver the highest levels of performance in all aspects of the haulage and commercial markets.

# Vipal VM729 - Drive Tread

The high mileage, long distance tread.

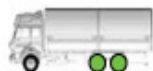

## Available Sizes:

315/70 R22.5

## Features and Benefits

- Excellent traction in wet and dry conditions.
- Tread design to maximise mileage and offer greater fuel efficiency thus, reducing running costs.
- Wide profiles available for greater stability.
- Unique compound for long lasting wear.
- Well proven tread design provides increased grip and stability in high horsepower, long distance drive axle applications.
- Proven tread designs.
- Cool running compound for optimum performance.

## Vipal VT510 - Drive Tread

**High performance resilient tyre to suit aggressive and demanding applications.**

### Available Sizes:

295/80 R22.5

315/80 R22.5

### Features and Benefits.

- Deep treads for increased performance and traction.
- Grips in both hard and soft terrain.
- Designed to improve resistance to irregular wear.
- Tread compound has been especially designed for resistance to punctures, cuts and damage.
- Excellent water dispersion.
- A heavy, strong and robust tyre.
